- About 300 m from the building of the Farmers' Cooperative in Tociuk (N50/100) near Klatovy an underground gasoline dump of 56 cisterns is being built. Each of the cisterns will hold about 30,000 liters. Some of them have already been laid in the ground and covered with a concrete layer about four meters thick. It is believed that the Klatovy airfield is connected by an underground pipeline with this dump. The cisterns are being supplied by Skoda Works in Pilsen. Construction is expected to be completed by late spring 1951.
